Dr. Hollin
133 E. 73rd St.
New York, N.Y.

Dear Dr. Hollin:

The following is the report of the electroencephalogram performed
on [REDACTED]

ALPHA:

10 cycles per second, maximum voltage 80 microvolts, alpha activity
to 60% in occipital leads, right equals left.

BETA:

There is a moderate amount of 15 to 25 cps activity to 25 microvolt

ABNORMAL:

No abnormal activity is present.

Hyperventilation and photostimulation produced no significant
change.

IMPRESSION:

This is a normal electroencephalogram.

Thank you.

R. D. Karlan
